TYBEE BEACH SURPRISE PROPOSAL

North Tybee Beach
7:45pm Aug 1st, 2025

You will go past the rocks and follow water line where you'll eventually see the small **red rose**. It will be down the beach away from the crowds and placed near where the water breaks and flows back out to the sea. Depending on the crowds, it may be positioned a bit farther down the beach where things are quieter.

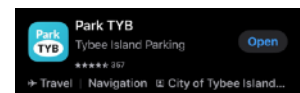

For positioning: your back will face the ocean, her back toward the land. The photo above shows the actual beach and the angle that we'll be shooting from—we'll both be photographing straight down the coastline, so please align yourselves just as we discussed on the phone.

Totally your call—parents can either wait in their cars and follow after you enter the boardwalk, or hang out on the beach ahead of time. If they choose to be on the beach, we recommend they head to the right and walk far enough down to ensure they remain out of sight. Once the two of you break that corner past the rocks it should be safe for them to come to that point for a better view.

No matter what you decide to tell them, once the proposal happens and they see it unfold, they can begin making their ways towards you both to join in for all the celebratory hugs and fun! We'll be sure to capture all of that as well!

Instructions & Reminders:

- Please snap & text a quick **couples photo** once dressed so that we can spot you at a distance.
- Please **do not arrive early** or we may be at risk of being seen with our cameras and/or not in positions.
- Please do not forget to **send us your iPhone location** 30mins before our scheduled time so that we can track you. Here's our cell (912) 321-1031.
- When you're pulling into the beach parking area, **please text us** a thumbs up. This serves as a back up plan since this area can be notorious for limited cell phone reception.
- You can download the "Park Tybee" app vs. using the kiosk.
- We will be acting as beach goers sitting on a blanket with our cameras hidden or blending in with other people with our cameras hidden.

- **IMPORTANT!**

Once you're at your mark, smoothly position yourselves face-to-face, gently guiding her so that her back is toward the land/sun. When you drop to your knee, **please take your time** and don't pop up too quickly. Soak in the moment, gaze into her eyes, smile, or say something sweet, just please don't rush to get up. We love having enough time to capture a beautiful series of wide and close-up images during this special moment. She'll likely notice us with our large cameras at this point but in our opinions, that just adds to the excitement and fun a surprise proposal and those photos are super sweet as well!
